Education

Diploma in Software Engineering, GPA: 4.0. Centennial College, Canada. 2022
Bachelor of Applied Science in Physics and Mathematics, GPA: 3.8. St Petersburg University, Russia. 2019

Core competences

Soft Skills: Good communication; Attention to details; Good time management; Ability to work in team.
Technical Skills: C#, .NET Core, JavaScript, TypeScript, SQL, React.js, Node.js, Python, AWS.

Professional Experience

NetVerse, Social Media App, Independent Project. Toronto, ON (08/2023 – 12/2023)
Junior Software Developer | ASP.NET Core (C#), React (TypeScript), SQL Server, AWS
- Developed social media with features like profile creation, messaging, following, likes, and posting.
- Applied skills in C# on the backend and React (TS) on the frontend.
- Utilized SQL databases for data management.
- Employed modern cloud applications, such as AWS, for file storage, image hosting, and SQL database hosting.
- Implemented real-time messaging using SignalR.
- Integrated Google OAuth for user authentication.

Video Sharing Platform, YouTube Clone, Independent Project. Toronto, ON (04/2023 – 08/2023)
Junior Software Developer | ASP.NET Core (C#), React (TypeScript), SQL Server, AWS
- Created a video sharing platform with features like video posting, commenting, and subscribing.
- Applied skills in C# on the backend and React (TS) on the frontend.
- Worked with SQL databases for efficient data storage.
- Utilized AWS for storing videos, comments, and hosting the SQL database.

Weather App, Independent Project. Toronto, ON (02/2023 – 03/2023)
Junior Software Developer | Node.js, React.js
- Developed a weather app using React.js and Express.js to display current weather and forecasts based on location.
- Applied skills in Node.js (Express.js) for backend development and React (js) for frontend development.
- Integrated an external API to fetch weather data.

Task Tracker, Centennial College. Toronto, ON (01/2022 – 04/2022)
Student | Node.js, React.js, MongoDB
- Collaborated with a team of 4 students to create a comprehensive project management tool.
- Played a key role in the development of a custom project management solution, similar to JIRA.
- Contributed to all aspects of the project, showcasing effective teamwork and collaboration skills.
- Applied Node.js, React.js, and MongoDB to build a robust and scalable application.
- Gained practical experience in working with agile methodologies, fostering adaptability and iterative development.
